SUBJECT OF CONVERSATION

EPA Cleanup of PCB from Duwamish, River, Seattle, Washington

INCOMING CALL

PERSON CALLING	ADDRESS	PHONE NUMBER AND EXTENSION
Ron Lee	EPA Coordinator Seattle, Washington	442-1352
PERSON CALLED	OFFICE	PHONE NUMBER AND EXTENSION
Gerald Keller	Corps of Engineers Regulatory Functions Branch	764-3495

OUTGOING CALL

PERSON CALLING	OFFICE	PHONE NUMBER AND EXTENSION
PERSON CALLED	ADDRESS	PHONE NUMBER AND EXTENSION

SUMMARY OF CONVERSATION:

1. Ron Lee, EPA permit coordinator, called to request emergency approval of dredging to remove PCB from near Slip #1 on the Duwamish Waterway. They want to begin dredging Monday, 30 September 1974.
2. EPA will dredge up to 4000 cubic yards of material with a 20-inch hydraulic dredge. The material is to be placed above ordinary high water on the south end of Kellogg Island in a diked area lined with plastic.
3. I asked Mr. Lee if the cleanup plan had the approval of Interior, NOAA, State of Washington and the City of Seattle. He said he had coordinated with the State already and would contact the other agencies immediately. He later called back and advised that Interior, NOAA, the State of Washington and the City of Seattle had approved the cleanup plan.
4. Based upon the above information furnished by Mr. Lee, I prepared a teletype to OCE recommending emergency approval of the work.
